

## VMware Horizon Client to enable Visual Components 4.2

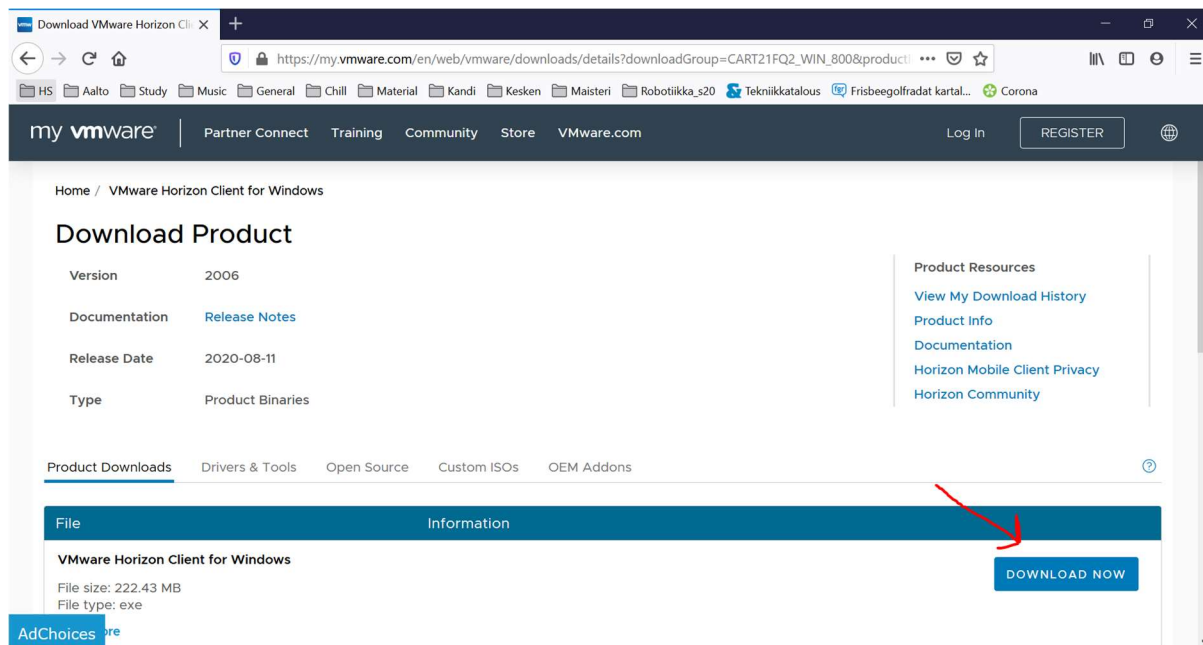

1. Open your browser and go to *vdi.aalto.fi*
2. Install VMware Horizon Client

3. Select the right version for you: Windows, Mac, Linux, iOS etc. (showing Windows in the picture)

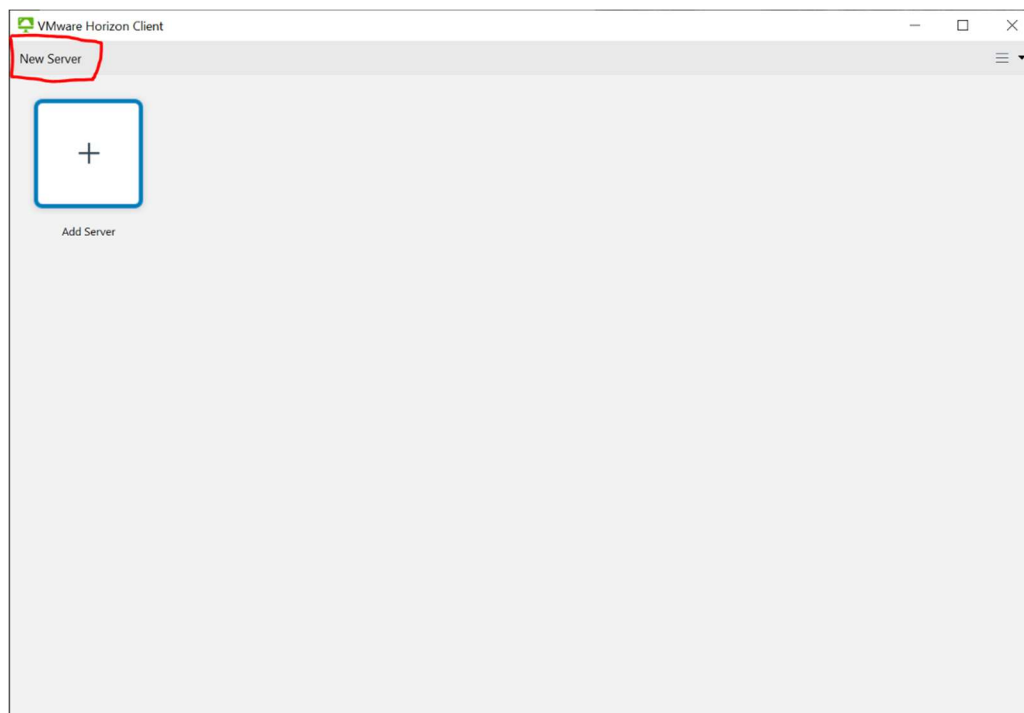

4. Click download now

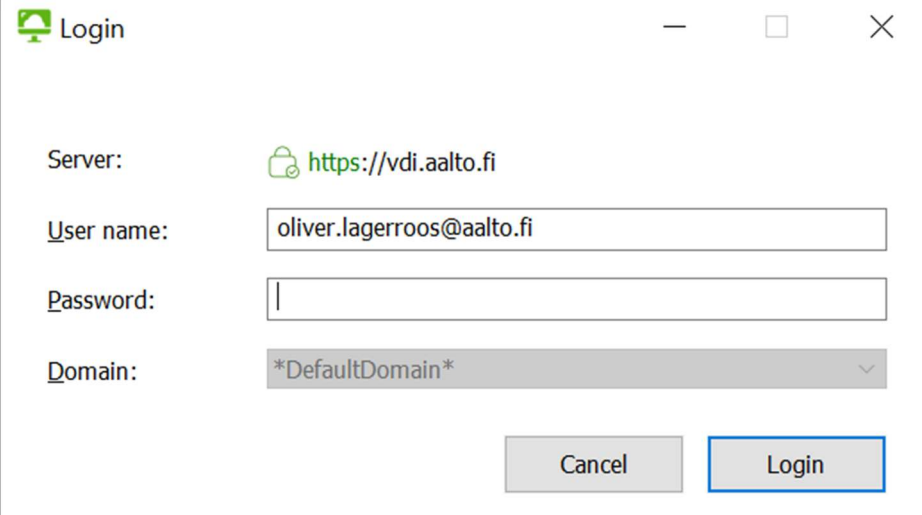

5. Follow the instructions, the program requires rebooting your computer

6. Click new server

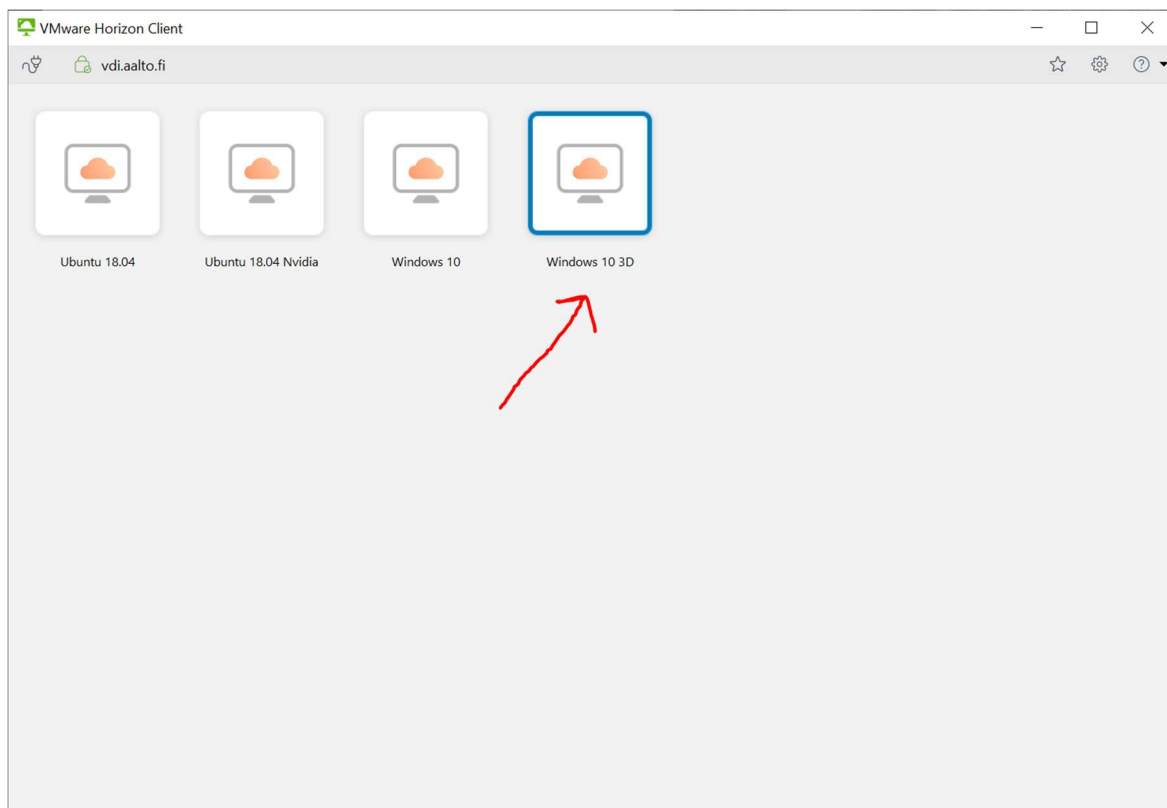

7. Enter *vdi.aalto.fi* for the server
8. Log in with **your Aalto-account** (here is the email address of the course assistant again!)

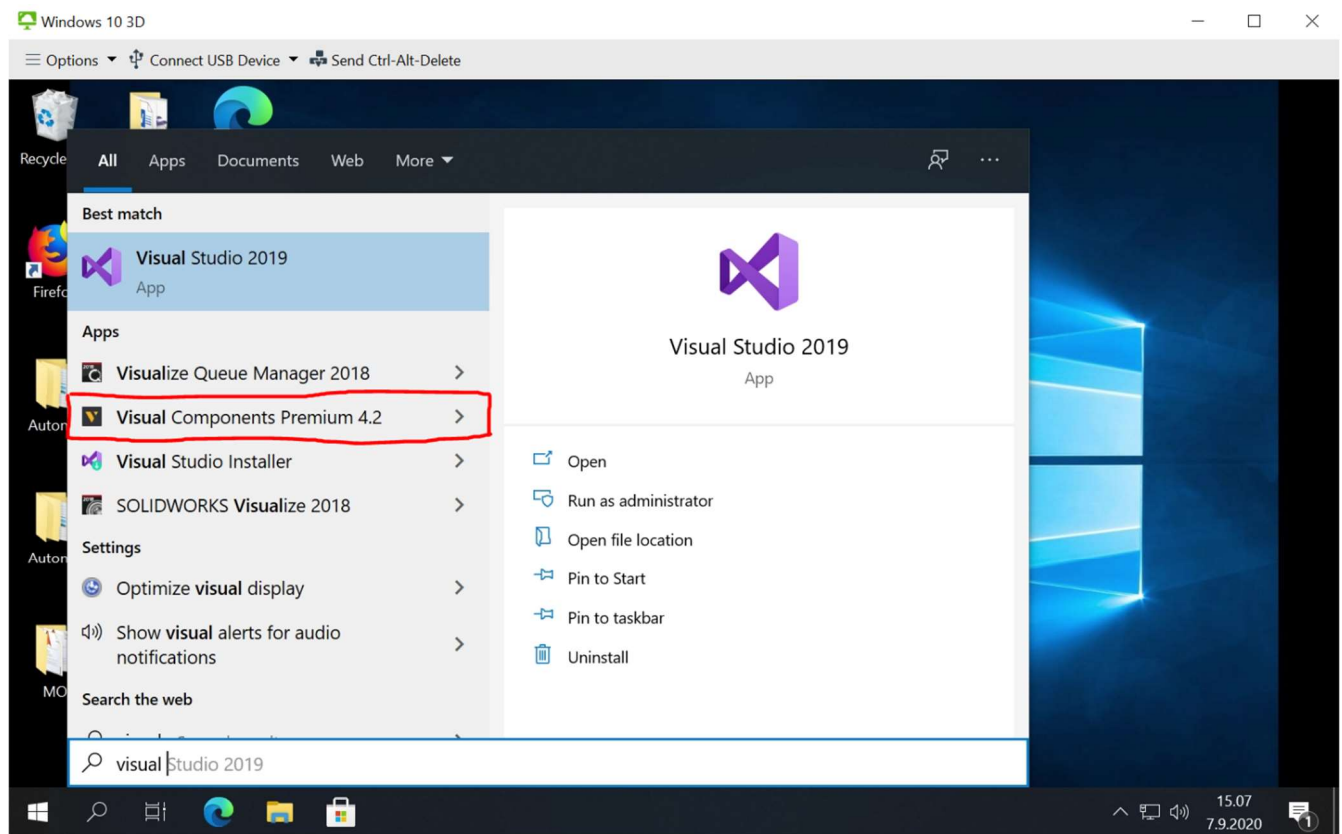

A login dialog box titled "Login" with a green icon. It contains four fields: "Server:" with a green lock icon and the text "https://vdi.aalto.fi"; "User name:" with a text box containing "oliver.lagerroos@aalto.fi"; "Password:" with an empty text box; and "Domain:" with a dropdown menu showing "\*DefaultDomain\*". At the bottom right are "Cancel" and "Login" buttons.

9. Choose Windows 10 3D -computer

10. Wait for the startup (this may take couple of minutes during the first time)
11. Search for Visual Components Premium 4.2 and launch the application
